INDUSTRY PARTNERSHIPS

INNOVATIVE SOLUTIONS

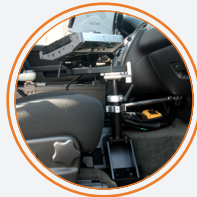

Tablet & Laptop Docking

- Secure location for charging and usage in the field
- Port replication provides reliable access to essential peripherals
- Tested to highest safety standards

Equipment Mounting

- Organizes valuable computing and radio equipment
- Broad array of vehicle specific and universal solutions
- Optimize in-vehicle workspace

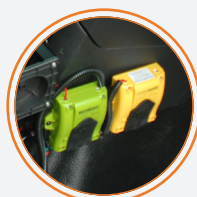

Motion Devices

- Improve visibility and ergonomics
- Ideal for computer usage by both the driver and front passenger
- Adjustable, quick-release handle positions device and dock

Computing Accessories

- Havis Rugged Keyboard and Integrated Mount
- Printer mounts and arm rests
- Rugged communications hub
- Desktop stand for tablet docks

Power Management

- ChargeGuard® Auto Shut-off Timer prevents battery drain and protects expensive electronics
- IdleRight2™ reduces engine idle time and fuel consumption

Utility & Electric

- Fleets are vital to maintaining public utilities like electricity, water and telecom services
- Utilize bucket trucks, cranes, boom trucks and digger derricks

Emergency Services

- Mission critical data transmission, essential for Police, Fire, & Medical
- Improved situational awareness for effective communication under the most challenging conditions

Material Handling

- Movement, warehouse storage, control and protection of materials, goods and products
- Utilize industrial trucks, forklifts and work carts

Transportation

- Coordinate the movement of goods to consumers through various modes of transportation
- Include logistics services and freight trucking

Railroads & Railways

- Specialize in the maintenance and service of freight railroad and railway operations
- Fleets assist with construction, repairs and quality inspections

TESTING & CERTIFICATIONS

Impact Testing

30-mph crash simulations per SAE J1455 include forward, rearward and side impacts to mimic the physical stresses and significant forces of an accident.

Vibration Testing

Military-grade vibration testing ensures that your Havis solution can withstand rugged driving conditions without transmitting damaging shock to a docked device.

Cycle Testing

During extensive cycle testing, the docking station latch is opened and closed 30,000 times while the laptop or tablet is docked.

ISO 9001:2008 Certification

Havis delivers the industry's highest quality products and services. We design, engineer and build safe, reliable, ergonomically efficient products for mobile workers.

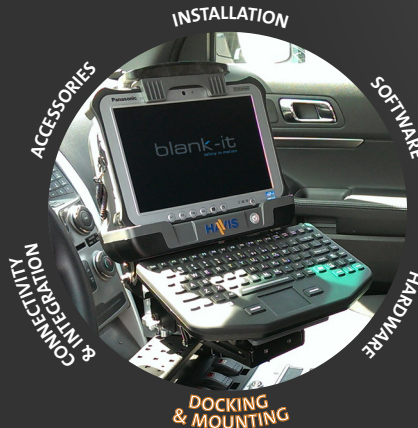

EXPERIENCE HAVIS

- Privately Owned, Financially Solid
- ISO 9001:2008 Certified Manufacturer
- Rugged Product Expertise Over 15 Years
- Dedicated Engineering Team
- Trusted Consultative Approach
- Committed to Educating Market Place
- Help Solve Diverse Challenges in the Field
- Unsurpassed Service & Support
- Effective Collaborative Engagement

TOTAL MOBILITY SOLUTION

Havis is a key component of your Total Mobility Solution, which starts with a business problem and includes the following:

- **Software** to solve the business problem for the end user
- **Hardware** to run the software inside the vehicle
- **Connectivity & Integration** to back-end systems
- **Docking & Mounting** solutions to make sure the hardware is mounted safely and allow for greatest uptime and productivity
- **Professional Installation** partners to make sure that the equipment is properly installed
- **Accessories** to assist in completing your Total Mobility Solution
